

# Geetika Dubey

Hello ! My Name is Geetika Dubey

I am a final year B.Tech Student Specializing in Computer Science.

I consider myself a quick learner and a dedicated individual with a positive and strong Self Confidence.

During my academics, I developed a keen interest in Software development and real-world Solutions which led me to work on Several projects, but my most important one is (Cine Geet) (An online movie ticket booking System)

I observed Some common pain points Such as High Convenience cost, Complex Seat Selection, delayed refund, limited personalization and there is not any group booking and Split payment option.

To Solve these issues our System introduces Several innovative features.

Low Or zero Service charge to make booking affordable.

AI based Smart recommendation that Suggest movies/events as per user Interest.

Smart Seat booking with best-Seat auto Suggestions for a Smother Experience instant refund So that user don't face delays after Cancellation, group booking with Split payments, allowing friends to Shear Seats & pay individually and An event discovery hub to highlight not just blockbusters movies but also Shows, Concerts & Cultural events.

I truly believe that Every movie Deserves a great audience and Every audience deserves a Seamless booking experience. Our system bridges that gap.

Apart from technical Expertise, I value ethical behavior and Continuous learning. My goal is to grow as professional while contributing the best version of myself to the Company's Success.

Thank you !
