SUMMARY

"Motivated and detail-oriented Computer Science undergraduate with a strong foundation in programming, data structures, and web development, seeking an opportunity to apply technical skills and gain hands-on industry experience."

PROJECT

Project: CineGeet – Online Movie & Event Ticket Booking System   **2024**

- Designed and developed a responsive movie & event booking platform using HTML, CSS, JavaScript, and MERN stack (MongoDB, Express.js, React.js, Node.js).
- Enhanced user engagement by solving gaps in existing apps through AI-powered recommendations, real-time seat selection, secure multi-payment & split-payment options, and local events & shows listing.
- Optimized the booking experience with a seamless, personalized interface and proposed future extensions like a mobile app, chatbot assistance, and AR-based previews.

LexYatra Legal │Frontend Web Project   **2025**

- Developed a professional and responsive legal services website using HTML, CSS, and JavaScript.
- Designed clean UI sections for services, contact, and client information with a focus on usability.
- Deployed and maintained the project using GitHub Pages with proper Git/GitHub version control.
